

Urethane Coatings - Monothane® Satin a Corker!

Taking care of your timber

Protect your Cork Floor with Monothane® Satin

Cork flooring is stylish, hard wearing and environmentally friendly as it is harvested from tree bark which is both a natural and renewable resource.

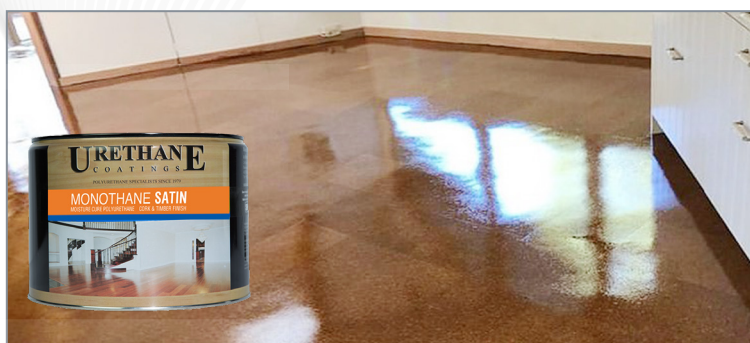

In addition to this Cork Flooring is noise absorbing, provides thermal insulation, resists mould and mildew, it is incredibly quiet under foot all of which make it an ideal flooring solution for busy households.

The soft surface of cork acts like a kind of cushion so is pleasant to walk on even in bare feet this also makes it a very popular choice in rooms where you are likely to be standing for long periods such as kitchens.

To ensure longevity of your cork floor seal and protect it with **Urethane Coatings MONOTHANE® SATIN**.

MONOTHANE® SATIN is a transparent, single pack, moisture cure polyurethane that provides a hard wearing Satin finish which maintains the natural character of the timber. So you can protect your Cork Floor with **MONOTHANE® SATIN** while retaining the natural earthy colours of the cork and its rich visual texture.

MONOTHANE® SATIN is suitable for coating all timber species, cork, particle board and concrete and is compatible with other flooring systems from Urethane Coatings Range.
