

Timber Floor like new after Refurb with Monothane® Satin

Taking care of your timber

A neglected timber floor was in need of some attention to bring it back to life. All that was needed was some Tender Loving Care, after re-sanding the floor it was coated with Urethane Coatings **MONOTHANE® SATIN** and looked like a completely new floor.

MONOTHANE® SATIN is a transparent, single pack, moisture cure polyurethane that provides a hard wearing Satin finish while maintaining the natural character of the timber.

So you can protect your Timber Floor with **MONOTHANE® SATIN** while retaining the natural beauty of the timber.

MONOTHANE® SATIN is suitable for coating all timber species, cork, particle board and concrete and is compatible with other flooring systems from Urethane Coatings Range.

MONOTHANE® SATIN Protecting Your Timber
