

## Lighter & Brighter with WaterKote® 2K Limewash

*Taking care of your timber*

### Lighter Brighter Baltic Cypress with WaterKote® Limewash.

Lime Wash finish often associated with Coastal Homes was originally inspired from the Sand Swept beaches and Coastal Cliff's. At one time lime washed wood flooring was a cost effective solution for those people who couldn't afford paint.

Now it is selected as a desirable design option and is featured in modern urban homes, as well as still having a strong presence in coastal design.

The Lime washed floor is a great choice for small spaces, which benefit from a lighter, brighter look giving the illusion of more space.

This homeowner wanted to create a more modern look to their living area and were after a lighter brighter floor to go with their contemporary styling.

To achieve the desired look for the home owner the contractor chose **Urethane Coatings, WaterKote® Limewash Sealer** to give the Baltic Cypress the white weathered look while retaining the natural character of the timber. Once sealed the floor was finished with **WaterKote® 2K Satin** creating a beautiful satin finish.

WaterKote® SEALER	1 component primer/first (sealing) coat
	Extended open time
	Excellent flow and levelling
	Reduces the risk of edge bonding and tannin bleed
	Retains the natural colour of timber
	Reduced sheen finish prevents 'misses' in the next coat
	Subsequent coats remain on the surface maximising the wear layer
WaterKote® 2K Limewash	A NEW generation 2 component water borne polyurethane
	Extended open time
	Exceptional flow and levelling.
	Can be walked on after 24 hours
	Full Cure 5 - 7 days after application
	Non - Yellowing - UV Stable
