

Eracoat 2K Rapid Provides Rapid Response

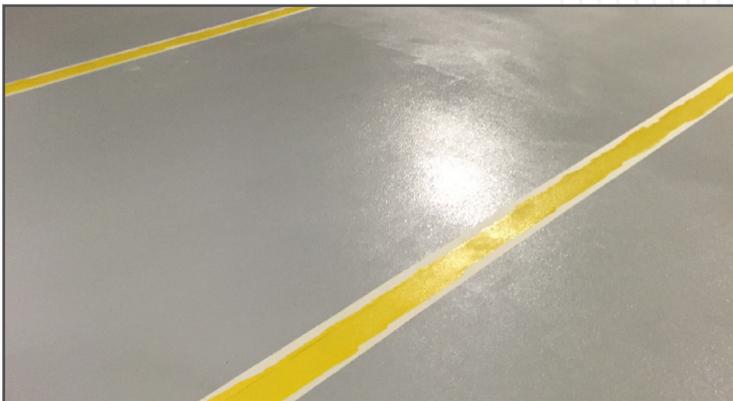

Excellence in Polyurethane Chemistry

A busy Police Station operating 24 hours a day 7 days a week required a high performance anti-skid surfacing for their car park. **Eracoat 2K Rapid** provided them with the perfect solution.

The Police Station required an anti-skid surfacing & line marking for their car park:

- To increase the longevity of their car park by protecting the concrete substrate.
- To improve the aesthetics of the car park
- To provide an anti-skid surface due to the speed and volume of vehicles using the car park.
- Provide clear delineation of car spaces in Safety Yellow

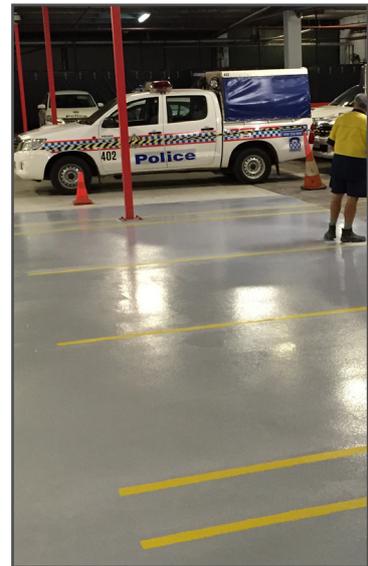

Due to the nature of their operation being 24 hours it was not possible to close the area so they needed a system with a quick turn around and minimum disruption to their operation. **Eracoat 2K Rapid** was the ideal choice.

Contractors **Laef Sisley** used the following products for the Police Station car park:

Eracoat 2K Rapid – Grey & Safety Yellow for the line markings. The whole area was then broadcast with Non-Skid 50, anti-skid particles to achieve the anti-skid finish required.

The car park was fully operational within 2 days.

Eracoat 2K Rapid

100% solids aliphatic	Excellent colour retention
1:1 Mix Ratio by volume	Convenient to use
Solvent Free	<ul style="list-style-type: none"> • No Flammability Issues • Minimal Environmental Impact
Rapid Cure	High Productivity / Quick Turn Around
Resin Elongation >70%	Good flexibility with expansion and contraction of concrete
Bonds to existing coatings	Ease of application
1-3mm Aggregate or Oxides	Dependent on requirements
